

Communication and Community Engagement

Members of the Environment and Design (E&D) team for the Neighbourhood Plan are Barry Clift, Ed Neal, Nick Watson and clerk Thomas Walker

Our tasks include:

- Setting up of a free storage platform for task group team leaders to be able to put their reports for other task group members to share
- Summaries of these reports will be published to the community via the Parish Council's website
- We would also use the existing Haversham Facebook site to drive traffic to the website to encourage residents to read its latest content
- The Parish magazine plus noticeboards would also serve as useful tools to ensure the widest possible community is made aware of the latest development
