

Environment and Design Task Group

Members of the Environment and Design (E&D) team for the Neighbourhood Plan are Pam Furniss, Laura Boddington, Kieron Tanner and Philip Turnbull.

Our tasks include:

- Research and collate existing environmental information about all areas within the parish boundary. This includes data on wildlife and ecology, conservation status, land use, heritage status, tree preservation orders, footpaths, flood risk etc.
- Prepare a character assessment of settlement areas in the parish to support the design aspects of the Neighbourhood Plan.
- Consider opportunities for environmental enhancement such as designation of Local Green Spaces.

In addition to online searching and direct communication with local stakeholders, we are also using the results of the questionnaire as a source of information about community wishes and priorities.
